

Project requirement document

Create 3 pages namely

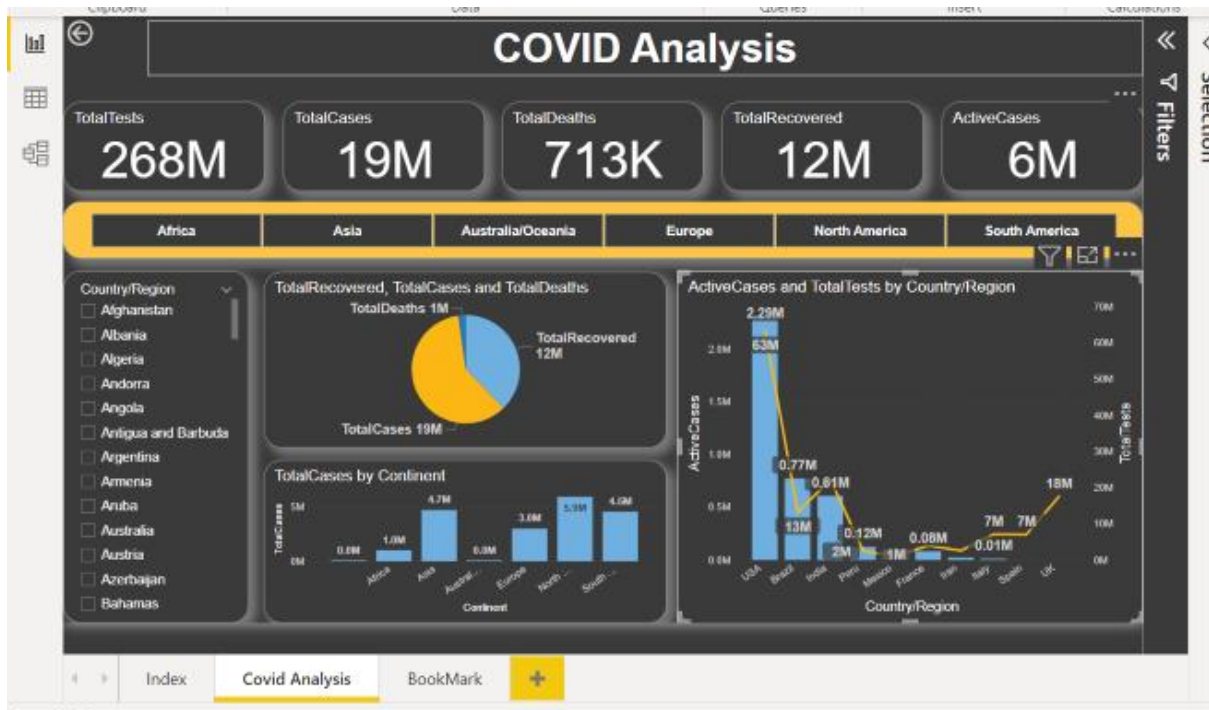

- Index
- Covid Analysis
- Bookmark

Index page should look as below, and when we click on any page it should take us to that particular page

Page 2 – Covid Analysis

Create the below visuals with the same colors

Back button

5 card visuals

2 slicers (Country / region and for continent)

Pie chart – Total Cases, Total deaths and Total recovered

Col chart – Should drill down based on Total cases

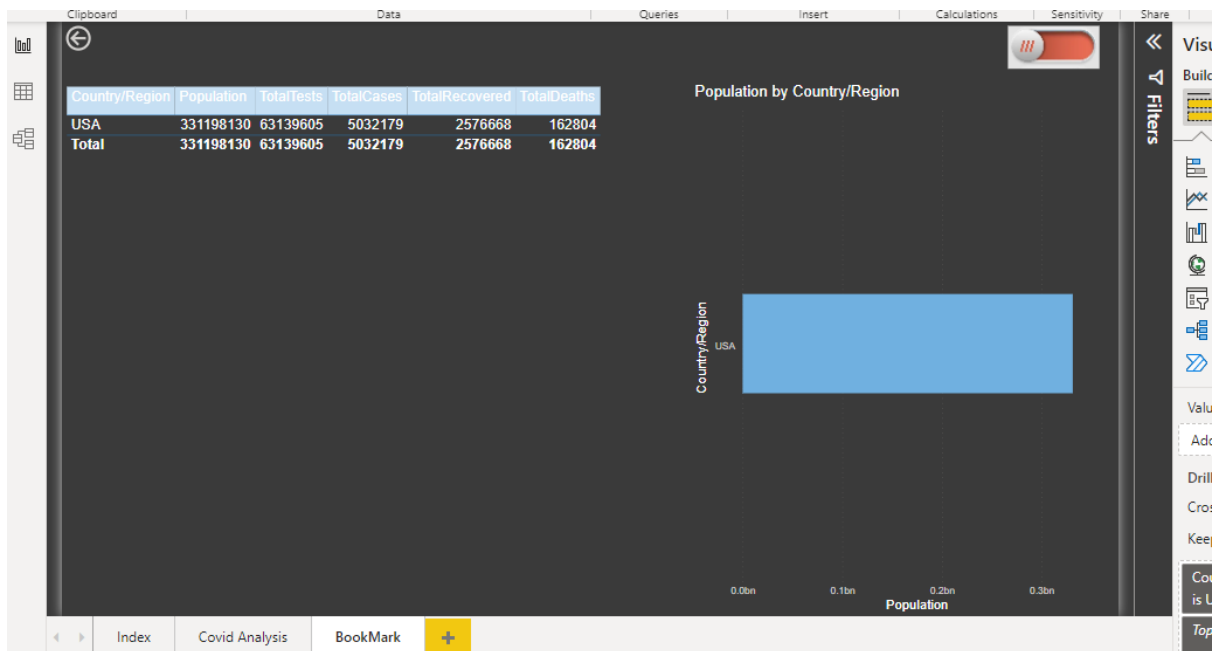

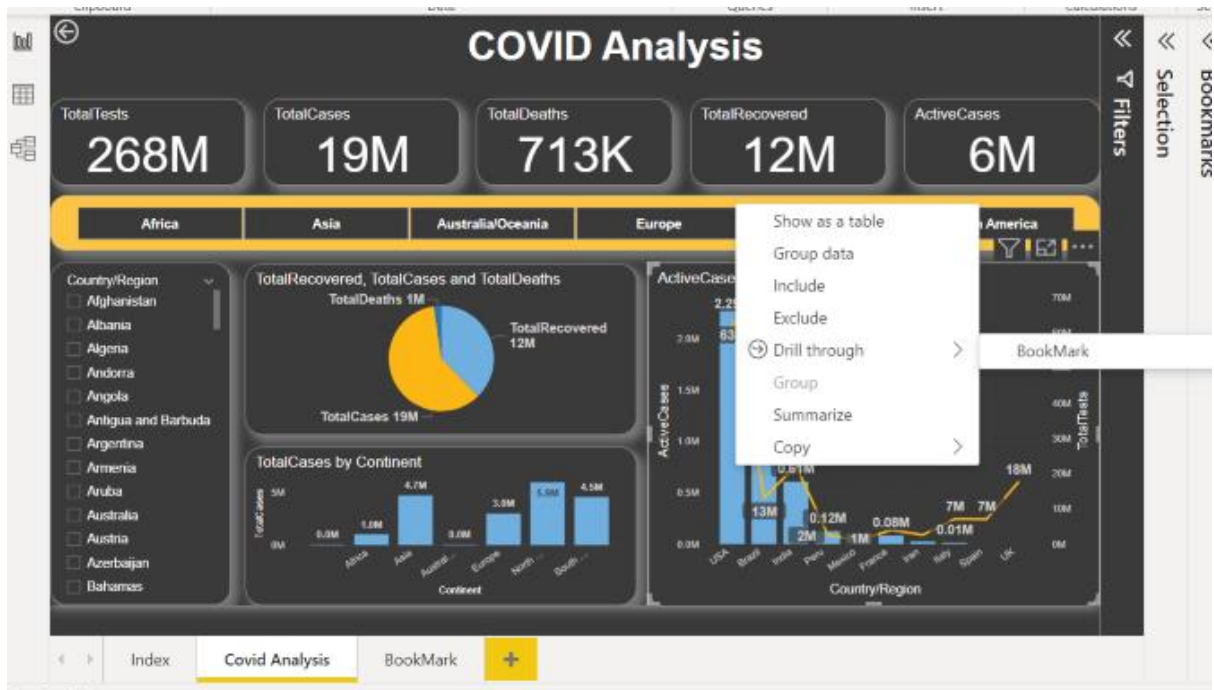

Hirarchy should be as below

- Continent
- Country /region

Combo chart – Active and total tests by country/ region

- Here I want only top 10 countries with highest death.
- This should be configured with drill through option and should drill through to the bookmark page

Eg : When I drill through the USA col it should go to the bookmark page and should show the below charts

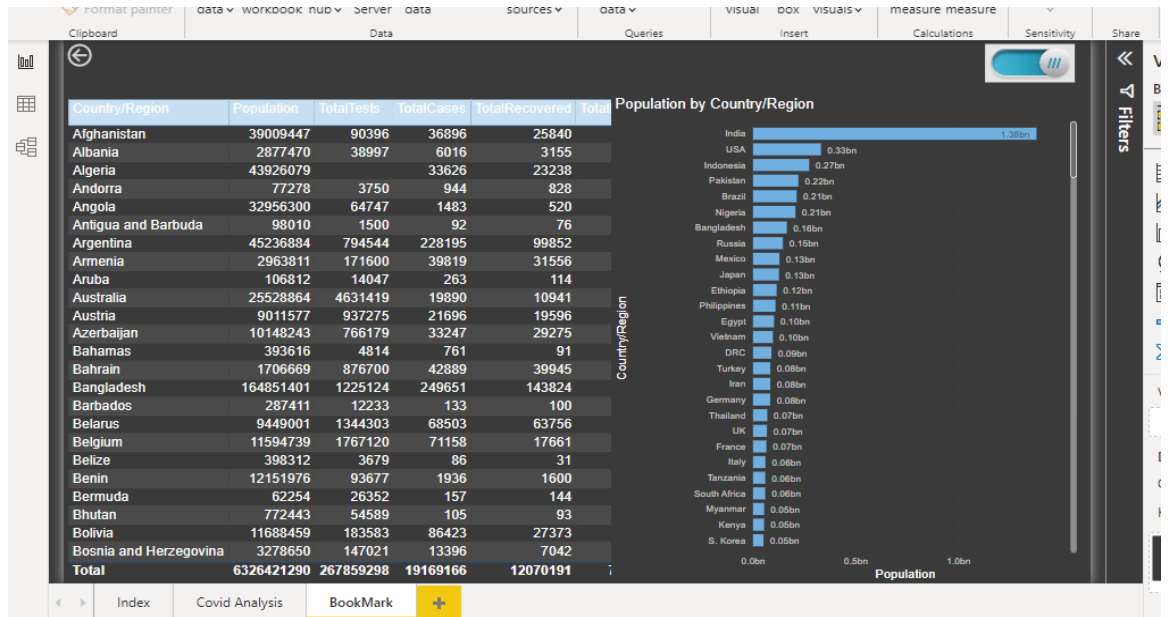

Page 3 – Book mark page

Create a Table visual with

- Country / region
- Population
- Total tests
- Total cases
- Total recovered
- Total deaths

Bar chart showing Population by country

- Here I need a book mark with toggle button
- When we click **on** it should show the chart with data labels on

- When we click **off** it should show the chart with out data labels as below
